291

ITEMS WITH A PLAN, NOT
YET BUILT

Fully migrated

8 CONTENT TYPES

≥95% of legacy posts already exist on the rebuilt site.

Blog 542 of 544		100%
Newsroom / Press 64 of 64		100%
Infographics 15 of 15		100%
FAQ 60 of 60		100%
People 8 of 8 (leaders + authors)		100%
Whitepapers 67 of 69		97%
Case Studies 156 of 157		99%
Webinars 149 of 155		96%

In progress

4 CONTENT TYPES

Actively migrating — scripts exist and are running, not yet complete.

Guides & Research 22 of 25		88%
--	------------------------	------------

Solutions

98 of 114 · 7 imported, content not yet generated

86%

Products

14 of 24 · legacy slug is branded-products

58%

Pages

19 of 67 · hand-rebuild, no shared template

28%

Not yet started

2 CONTENT TYPES

0% by this measurement — but read the note before treating that as "no progress."

Testimonials

0 of 154 by this measurement*

0%

Toolkits

0 of 6 · reference sheet ready, live-build planned

0%

***Testimonials note:** this report counts posts created by the standalone Testimonials migration script specifically, which hasn't been run. It does not count the roughly 130–150 testimonial posts that already exist — those were created as a side effect of the Case Study migration's create-and-reference step. Real coverage is much closer to complete than 0% suggests; treat this row as "the dedicated script hasn't run," not "no testimonial content exists."

Flagged for review

2 STALE PLANS

These two rows in the progress-tracking script describe an earlier plan that later analysis has since superseded. Worth updating `migrations/report-progress-summary.php`'s hardcoded notes to match.

Product Overviews (9 posts) — tracked today as "extends existing CPT... mirrors Webinar Settings." The dedicated reference sheet (built after this note was written) recommends the opposite: keep `product-overview` as its **own CPT**, with a Post Object field driving a derived permalink (`/products/{slug}/overview/`). See `notes/reference-sheets/product-overview-reference-sheet.md` .

Videos (3 posts) — tracked today as "likely folds into webinar." The reference sheet recommends a **minimal standalone CPT** instead, reusing the shared Recording field group — folding into `webinar` would carry a lot of unused apparatus (date/time fields, presenters, lifecycle state) these pages never use. See `notes/reference-sheets/videos-reference-sheet.md` .

Architecture decided, not yet built

4 CONTENT TYPES

Industries

8 posts

Folding into standard Pages — legacy slug is `who-we-serve` , not "industries."

PLAN CONFIRMED

Award Recipients

4 posts

Folding into one block pattern for `/bring-on-better-awards/` ; CPT retires.

PLAN CONFIRMED

Product Overviews

9 posts

Own CPT recommended (see callout above) — tracker note is stale.

NEEDS SYNC

Videos

3 posts

Standalone CPT recommended (see callout above) — tracker note is stale.

NEEDS SYNC

Decision needed — reference sheet ready

6 CONTENT TYPES

Landing Pages

166 posts

143 collapse into one BOF/MOF template — script it. Get the active-campaign list from marketing first.

SHEET READY

Integrations

62 posts

Just name + logo + 2 taxonomies. CPT vs. repeater is the only open call.

SHEET READY

Donation Examples

32 posts

One consistent card shape — straightforward script candidate.

SHEET READY

Interactive Tools

4 posts

Quiz pair folds into Landing Page patterns; Thermometer blocked on one more export.

SHEET READY

Events

2 posts

2 unrelated shapes — hand-build from shared patterns, no CPT.

SHEET READY

Video Testimonials

1 post

Recommend folding into `testimonial` with a video type — same call as Reviews.

SHEET READY

What's next

Condensed from `notes/reference-sheets/recommended-sequence.md` — see that document for full rationale.

0 Decisions first (cheap, unblocks everything below)

Fold Reviews + Video Testimonials into `testimonial` ? Confirm the Videos CPT approach. Pick a Toolkits card-grid model. Kick off the marketing ask for Landing Pages' active-campaign list now — it has its own turnaround time. Check what the Who We Serve megamenu currently links to.

1 Quick wins

Integrations, Award Recipients, Donation Examples, Videos, Reviews, Video Testimonials — small, uniform, no remaining blockers once Phase 0 lands. Parallelizable; doesn't need to be Greg specifically.

2 Gated-content family

Toolkits (the handoff meeting's live-build subject), then Product Overview right after — it reuses the same gated shell while it's still fresh, plus the already-documented `recordings.php` groundwork.

3 Bespoke hand-built pages

Build one shared pattern library (hero, stats, accordion, features, testimonials, FAQ, CTA, carousel), then reuse it across Pages (its own cluster order already exists), Who We Serve, Events, and Interactive Tools.

4 Landing Pages

Last, on purpose — biggest item, but 143 of 166 posts collapse into one template. Do this once the marketing input is in hand and the Phase 3 pattern library already exists to draw from.

5 Pipeline feature additions (net-new, never on the legacy site)

Requests arriving via Asana for the rebuilt site with no legacy equivalent: announcement bar customizations (CMS-editable content + scheduling), author bio pages (People profile template + Heather Noll byline fix for "Momentum in Action" posts), Who We Serve parent-page updates, and a Product Overview archive page. Also queued: webinar/series template updates and megamenu updates. See `notes/pipeline-features/`.

6 Anthropic API-powered improvements

A set of proposed uses of the Anthropic API beyond the existing per-Solution resource relevance tagger — see `notes/anthropic-api-roadmap.docx` for the full writeup.

Retiring & excluded

Not part of the rebuild — listed here so nothing looks forgotten.

ITEM	LEGACY COUNT	WHY
Assets (legacy)	177	Retiring — <code>video_embed_code</code> already folded into Webinars/Whitepapers migrations
Clients	20	Retiring — already marked "To be removed" on the current site
JetPopup	4	Plugin data (Crocoblock/JetEngine popup builder templates), likely not real content — confirm before ignoring
Maintenance Reports	1	Plugin data — still on the "evaluate" list in CLAUDE.md's dashboard items

Where to go for more detail: `CLAUDE.md` (architecture & conventions), `PROJECT-SUMMARY.md` (plain-language overview), `notes/reference-sheets/` (one sheet per remaining content type, plus `recommended-sequence.md` for the full build order and `done/` for what's already fully migrated), `migrations/progress.md` (this report's raw numbers, regenerate anytime via `report-progress-summary.php`).
